Corrigendum to ‘Inferring patterns of wildlife trade through monitoring social media: shifting dynamics of trade in wild-sourced African Grey parrots following major regulatory changes’ [Glob. Ecol. Conserv. 33 (2022) e01964]

Alisa Davies a, Neil D’T Cruze b,c, Cristiana Senni a, Rowan O. Martin a,d

a World Parrot Trust, Hayle, Cornwall TR27 4HY, UK
b World Animal Protection, 222 Grays Inn Road, London WC1X 8HB, UK
c Wildlife Conservation Research Unit (WildCRU), Department of Zoology, University of Oxford, Oxford OX1 3SZ, UK
d DST-NRF Centre of Excellence at the FitzPatrick Institute of African Ornithology, Department of Biological Sciences, University of Cape Town, Cape Town 7700, South Africa

The authors regret that an error was present in author affiliation in the original publication. Cristiana Senni is affiliated with the World Parrot Trust (a) but was incorrectly linked with DST-NRF Centre of Excellence at the FitzPatrick Institute of African Ornithology (d).

The authors would also like to amend a statement in the introduction, namely that ‘Parrots are also the most threatened avian order’, to ‘Parrots are one of the most threatened avian orders’, as this accounts for avian orders such as Mesitornithiformes where all members are threatened and in decline (McClure and Rolek, 2020).

Finally, the authors would like to provide better definition maps for Fig. 5.

The authors would like to apologise for any inconvenience caused.

Fig. 5. Country locations for posts advertising wild-sourced Psittacus parrots between (a) 2014–2017 (n = 250); and (b) 2018–2020 (n = 30). Circle size is proportionate to the number of posts (range = 1–56). Grey circles indicate exporting countries; black circles indicate importing and reexporting countries.
